

Magic Blue Powder

Remove the unfixed color and improve abrasion clarity

Can achieve the effect of heavy stone grinding style, moderate fry and moderate fully spray

Description

Magic Blue Powder is a brand-new cold bleach enzyme which provides a new method to create fashion. Compared with first-generation laccase, it is called as second-generation laccase, it can features the reactive dyed fabrics with unique effects.

No formaldehyde, APEO, heavy metal ions, and restricted and prohibited substances in line with the Oeko-Tex 100 standard.

Performance

- ◆ Effect on indigo dye and certain reactive dyes as well.
- ◆ Mild bleaching to keep strength and elasticity of the fabric.
- ◆ Remove the floating color of the pants surface and pocket, improve anti-back staining effects and abrasion clarity
- ◆ With high-end enzymes, it can better achieve the effect of heavy stone grinding style.
- ◆ With high-end enzymes, moderate fry and moderate fully spray can be achieved

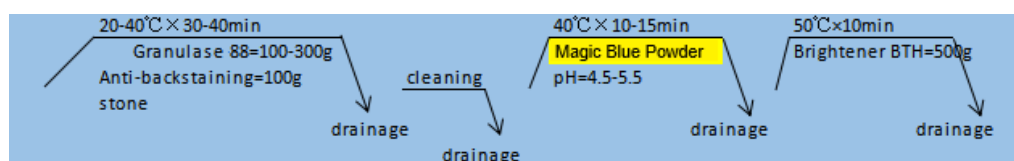

Physical and chemical characteristics

Surface	Red and white powder
pH	4.0-5.0
Ionicity	nonionic
Solubility	Dissolve in water

Reference process

Dosage	0.3-3.0g/L
Time	5-30min
Temp	Normal temperature-45°C
Using pH	4.5-5.5

Replace heavy stone grinding style craft

Remarks:

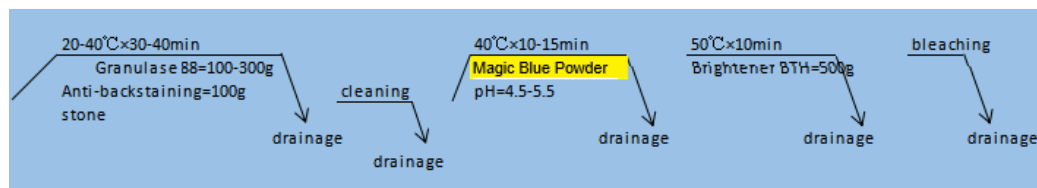

Add:203 Room,2 Build, No. 1588 of Huhang Road , Shanghai City, China.

If the traditional process adds 1-2 packages of pumice, the Magic blue powder process don't need pumice;

If the traditional process adds 3-5 packets of pumice, recommend to Magic blue powder process and add 1-2 packages of pumice;

Magic blue powder comes with buffer and can be used directly. It is recommended to test the pH to ensure the best use environment.

Replace moderate fry and moderate fully spray process

Remarks:

Magic Blue Powder process to replace the moderate fry and moderate fully spray process, it will get good abrasion effect in enzyme grinding process, as far as possible to add pumice grinding together in the allowable conditions.

Notes

Magic Blue Powder will immediately work in water, it must be taken out by dry beaker, or packaged with plastic bags to workers by the material weighting workers, recommend to take out as much as need using, sealed it when not use up, moisture will affect the performance of **Magic Blue Powder** .

Package and storage

50kg/Drum.

Store it in a shady and dry place where is below 25°C, avoid direct sunlight. The shelf-time is for 6 months under sealing conditions.

If it is not used up after opening, please store it with seal bucket to avoid failure.
